

Greening Energy Market and Finance

Erasmus Mundus Joint Master
(GrEnFIn – EMJM)

Co-funded by
the European Union

WHAT IS GRENFIN-EMJM

- 24-month Erasmus Mundus Joint Master
- Entirely conducted **in English**
- Offering **120 ECTS**
- Culminating in **a multiple degree** issued by **three lead partner universities:** Università di Bologna, Italy (coordinator), Ludwig-Maximilians-Universität München, **Germany**, Université Paris Dauphine, **France**
- Providing advanced interdisciplinary education aligned with evolving competencies for **digital and green transitions**, including deep-tech
- Including a mandatory student mobility at each of the three universities and an internship/raship during the fourth semester
- Offering international summer/winter schools, visits to research institutes or companies.

PROFESSIONAL PROFILES

Best students selected, coming from all over the world, will join an exciting international environment and will be trained to become:

- **Sustainable Energy Experts (SEEs), professionals able to face the energy transition and the environmental challenges**, steering the transition to a more sustainable economy.

COMPETENCIES ACQUIRED

SEEs play a crucial role by integrating a spectrum of competencies including:

- engineering expertise in **green energy sources**
- proficiency in **sustainable economics**
- quantitative skills in **risk management** and **financial engineering**.

> Erasmus Mundus Scholarships are offered to top-ranked students worldwide
